Professional Summary

SEO and digital marketing professional combining keyword research, content publishing and local search with analytics and campaign coordination. Turns source data into clear reports and next actions, works with CMS and CRM platforms, and documents repeatable processes. Uses AI-assisted research and drafting with manual verification.

Professional Experience

Digital Marketing & SEO Operations

Freelance | February 2023–Present | Current SEO engagement: part-time

- Research and categorize keywords by service, intent and location; map topics to relevant pages and support on-page content optimization.
- Support Google Business Profile work, service-area relevance checks, and citation and backlink coordination.
- Review Search Console, GA4, Ubersuggest and Looker Studio data; investigate ranking or indexing issues and document next actions.
- Prepare SEO updates, monthly reviews and email summaries; verify dates, source data and conclusions before delivery.
- Research blog topics, prepare material for client review, implement requested revisions and publish approved posts on client websites.
- Coordinate recurring tasks, track owners and blockers, and prepare process guides and onboarding materials for handoffs and quality review.
- Work with WordPress and Squarespace; support Google Ads keyword and landing-page planning, and track lead sources, stages and follow-up notes in GoHighLevel.

Subject Matter Expert / Customer Support

Foundever | August 2020–March 2023

Progressed to Subject Matter Expert in April 2021. Coached colleagues, monitored quality, handled escalations, analyzed performance and prepared reports and process guidance.

Selected Work

- [SEO, content & operations](#): Keyword mapping, client content review and publishing, campaign reports and follow-up workflows; anonymized excerpts and labeled templates.
- [IsIaClean Palawan](#): Independent, AI-assisted 10-page HTML/CSS/JavaScript website with service pages, internal links and a browser-only demo form.
